PROFILE

Hi, I'm Anita! I'm a Frontend Developer and Computer Science student passionate about building user-friendly websites and applications. I specialized in JavaScript, React.js, Next.js, and CSS, creating seamless, responsive user experiences and on process of learning Android studio for the mobile development. My love for technology and problem-solving led me to pursue web development, and I've been growing my skills through personal projects and hands-on learning. I'm excited by the balance of creativity and logic in web development, and I'm always exploring new tools to stay current with trends. If you'd like to collaborate or chat about frontend development, feel free to reach out—I'm always open to new opportunities!

PROJECTS & EXPERIENCES

- Portfolio Website** 2023
My portfolio website is a showcase of my skills and projects, built using Next.js to deliver a fast and dynamic user experience. It highlights my journey as an enthusiastic programmer, featuring my expertise in C, C++, Python, JavaScript, React, and more. This project reflects my commitment to continuous learning and growth in web development.
- Counter** 2023
I created a simple counter application using React. It allows users to increment or decrement the count by clicking the 'Add' or 'Subtract' buttons. This project showcases my understanding of React's state management and interactive UI components
- Drone Project (Team Project)** 2020
 - Assembled a quadcopter and successfully completed test flights.
- Mobile Development: Android Studio (Learning)** 2026
 - Actively learning Android application development using Android Studio and Kotlin.
 - Developing a [Swiftward App - a hospital real time ward management system] to understand Activity lifecycles, UI layouts (XML), and event handling.
 - Integrating Firebase for backend services to handle user data.
